Summary

Dynamic React Full Stack Developer with expertise in design, integration, and problem-solving. Proficient in JavaScript, Angular JS, PHP, and MYSQL. Skilled in translating business needs into technical solutions, debugging, and maintaining data integrity. Passionate about launching innovative projects and optimizing code for efficiency.

Skills

- Languages: **React Native, React JS, JavaScript, TypeScript, PHP, MYSQL, Angular JS**
- Frameworks: **React, Angular**
- Tools & Technologies: **Redux, Bit bucket, Postman, GitHub**
- Methodologies: **Code Optimization, Modularization, Package patching, Context APIs**
- Other: Business Requirement Translation, Software Development, Web Application Development.

Work Experience

Software Developer - Kapiital Kapslock Private Limited

Jan 2023 – Oct 2024

- Translated business requirements into technical solutions, launching successful projects.
- Developed and debugged web applications and software with precision.
- Integrated efficient APIs to enhance functionality.
- Maintained high data quality and integrity standards.
- Utilized debugging skills to improve code and user experience.
- Promoted better component life-cycle practices using React fundamentals.
- Modernized old code bases, reducing operating costs and improving functionality.

Projects

1. SquareNow Web and Mobile Application (Finance)

- Developed a Finance Loan Management System (LMS), catering to web and mobile platforms. Implemented user-friendly interfaces and real-time tracking features for enhanced engagement and performance monitoring.
- Integrated secure loan application workflows, customer onboarding modules, and dynamic dashboards for admins to manage loans, repayments, and user analytics effectively.
- **Technologies Used:** React, Redux, Angular JS, PHP, MYSQL

2. Pookadai Web and Mobile Application (E commerce)

- Contributed to the development of Pookadai, a flower delivery application, by implementing features such as product catalogue, ordering, and delivery tracking. Enhanced back-end processes for efficient order management and inventory tracking.
- Enhanced back-end operations by streamlining order management and inventory tracking processes, resulting in improved operational efficiency and customer satisfaction.
- **Technologies Used:** React, Redux, PHP, MYSQL

Software Engineer - Doodleblue Innovations

Oct 2024 – Present

- Engineered and optimized mobile applications tailored to client needs, prioritizing performance and usability.
- Implemented API integrations to deliver dynamic, feature-rich applications.
- Ensured high-quality standards in data handling, focusing on consistency, security, and scalability.
- Debugged and fine-tuned mobile applications, reducing crash rates and enhancing user satisfaction.
- Applied modern React Native best practices to develop maintainable and modular codebases.
- Promoted better component life-cycle practices using React fundamentals.

Projects

1. MOMO - Mobile Application (Payment)

- Designed and developed a mobile application for seamless payment processing, prioritizing user-friendly interfaces and real-time tracking features to boost engagement and monitor performance effectively.
- Integrated a wide range of bill payment options, catering specifically to Uganda's payment ecosystem.
- Implemented a CMS-driven architecture to dynamically manage and update screen content and values without requiring app updates, ensuring flexibility and faster content deployment.
- **Technologies Used:** React Native, Redux.

2. TMJ - Mobile Application (Digi-Gold)

- **Designed and developed the Thangamayil DigiGold mobile application**, enabling users to buy gold digitally through flexible installment-based plans and other purchase options. Focused on creating a seamless and intuitive user experience to encourage customer trust and recurring engagement in digital gold investments.
- Integrated secure payment workflows, real-time transaction updates, and deep linking capabilities for smooth onboarding and personalized user journeys.
- **Technologies Used:** React Native, Redux, Deep link from Appsflyer.

3. Stepping Stone - Mobile Application

- Developed a mobile application for a stone retail business dealing in tiles, granite, and marble products. The app enables store owners to efficiently manage their business operations, including supplier and customer management, inventory tracking, and sales workflows.
- Key features include the ability to add and update stock items, manage purchases from suppliers, and record sales to customers. The focus was on streamlining day-to-day operations and improving traceability of stock movement within the system.
- **Technologies Used:** React Native, Redux, Local Storage, REST APIs.

Education

- **Bachelor of Computer Applications**, (2018 - 2021)
St. Joseph's College, Trichy.
- **Master of Computer Applications**, (2021 - 2023)
St. Joseph's College, Trichy

Certification

- The Complete 2022 Web Development Bootcamp in Udemy. ([Click here](#))
- Google Data Analytics in Coursera. ([Click here](#))
